DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I, claims 1-32 in the reply filed on 09/22/2008 is acknowledged. The traversal is on the ground(s) that 3-fluoropiperidine moieties required in all the groups and as such all the groups should be examined together. This is not found persuasive because as stated in the previous office action, the invariant structural moiety in all the groups 3-piperidine moiety is not contribution over prior art as this unit is present in the compounds of cited reference.

The requirement is still deemed proper and is therefore made FINAL.

Claims 32-46 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 09/22/2008.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The claims are examined to the extent that they read on the compounds wherein the NH shown in the formula (I) linked to the carbon ortho to the nitrogen on the HetAr

ring. It is suggested that the formula (I) be redrawn or claim 1 is rewritten to make explicit recitation of this limitation.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

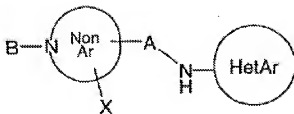

Claims 1-32 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Claiborne et al. (WO 02/068409 A1, International filing date 02.20.2002).

102 Reasoning:

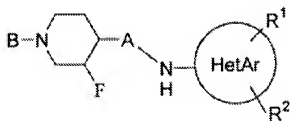

Formula (I) of claim 1 of (WO 068409) wherein X = F includes compounds of the instant formula (I).

103 Reasoning.

Claiborne et al. teach NMDA antagonist of the following formula

wherein NonAr and X are defined to include 3-fluoropiperidien. Other variables of the above formula are identical to that of the variables of the instantly claimed formula shown below:

The difference between the prior art and instant claims is that, in the prior art, the disclosed specific compounds are limited to piperidine unsubstituted at the 3-position. Thus 3-fluoropiperidines are not specifically claimed but are generically taught. However, one skilled in the art of medicinal chemistry, because of the known similarity of F and H in size, would be motivated to make 3-fluoropiperidine compounds as alternate forms of the piperidine compounds of Claiborne et al as NMDA antagonists.
